

THE ROADRUNNER CONE PLACEMENT & RETRIEVAL SYSTEMS

SAVES LIVES AND LABOR BY AUTOMATING THE PLACEMENT AND RETRIEVAL OF CONES AND OTHER CHANNELIZING DEVICES IN A WORK ZONE.

CPS (CONE PLACEMENT SYSTEM)

- ✓ Deploys 28"-42" cones with a 15" base
- ✓ Sets cones while traveling 12-15 MPH in forward or reverse
- ✓ Can be mounted on either side of truck using standard stake pockets
- ✓ Switching deployment side can be done in minutes by an individual worker

CRS (CONE RETRIEVAL SYSTEM)

- ✓ Retrieves 28"-36" cones with a 15" base
- ✓ Standard handheld electronic control for easy operation
- ✓ Retrieves cones and other devices at 12-15 MPH in forward or reverse
- ✓ Reduces risk of work injury or fatality resulting from exposure to traffic

LOWER LABOR COSTS BY REQUIRING FEWER WORKERS
